Comparator Charts Screens & Scales

Our *Standard -Hard-Image* has a proven history of *Durability*. Not all "*Hard-Image*" screens are created *Equal* in the comparator industry. We ask that you *do compare* our product to others. If the recommended cleaning techniques are followed, our *Hard-Image* will endure!
Cleaning Procedure In Brief, *Mild Dish Soap & Warm Water* with a soft cotton cloth, *Just That Simple!*

*** **Protractor Rings:** available for *Most* Styles & Sizes, with **NO additional** charge.***
(Inquire for availability)

Note: **Protected Image** screens are primarily used in harsh inspection environments. The glass screen is encapsulated, sealing the image from the elements. Our *Standard -Hard-Image* provides, a sharper more distinct image. However, if the environment warrants this type of protection, then the use of a protected image screen is suggested. Again, if the recommended cleaning instructions are followed, (provided by V.I.P.) the *Hard-Image* comparator screen/chart/s will endure.
